The Method

In this method, I will cover how I've been profiting with arbitrage betting and how you can do the same by following a few simple steps. I'm myself a beginner in this space, but I still found a profitable logical way to profit.

If you don't know what arbitrage betting is, it's betting on all outcomes of a sports event (usually Football aka Soccer) and taking advantage of price disparities.

I usually get a 0.5%-5% guaranteed return per match. Let me show you an example of an upcoming soccer match.

One bookmaker has these odds:

| | | | | | | | |
|------------------------------|--|------|------|------|-------|------|-------|
| ☆ LIVE 21:00 Feb 08 |  Burnley FC x  Manchester United | 5.15 | +1.0 | 1.77 | Total | Over | Under |
| | | 4.16 | | | | | |
| | | 1.68 | -1.0 | 2.14 | 2.5 | 1.8 | 2.1 |

The second bookmaker has these odds for the same match:

| | | | |
|--|---------|-----------------|--------|
| England : Premier League : Burnley - Manchester Uni... | | | |
| ☆ | All | Match | Totals |
| | | Handicaps | Combos |
| Halves | Minutes | | |
| Match Result | | | |
| Burnley | 6.40 | Draw | 4.70 |
| | | Manchester U... | 1.56 |

Do you see the difference? We will take advantage of that.

The Method

The image below is showing the optimal spread of stakes if you invest \$100 in total for the match on the previous page:

The image shows a betting calculator interface with a green background. It features three rows for bets, each with an input field for odds, a calculated stake, and a calculated payout. The total stake is set to \$100. The interface also includes buttons for 'MORE BETS', 'RESET', and 'CALCULATE', along with summary statistics for total payout, profit, and ROI.

| | Enter Odds & Stake | Stake | Payout |
|-------|--------------------|---------|----------|
| Bet 1 | 6.4 | \$16.20 | \$103.71 |
| Bet 2 | 4.7 | \$22.07 | \$103.71 |
| Bet 3 | 1.68 | \$61.73 | \$103.71 |
| Stake | 100 | | |

Buttons: **MORE BETS**, **RESET**, **CALCULATE**

Summary:

- Total Payout: **\$103.71**
- Total Profit: **\$3.71**
- ROI: **3.71%**

As you can see you have a 3.71% guaranteed profit from just one match. This is more than traditional savings accounts pay you in a year!

How can I do the same?

To get started you will need to invest some money, I'd go with \$100-\$120 minimally. You can obviously invest more, but \$100 is a good amount to get started with.

Then I visit [this website](#) that finds arbitrage matches for you. I recommend you to sort there by "Latest" because odds for older matches are sometimes no longer valid.

You will see there a list of risk-free bets. Now I recommend you to register with as many bookmakers as possible, some might require the usage of a VPN to register. Always use there your real details, otherwise, you might not be able to withdraw.

The Method

You can also try to sort by “Start time” if you want to see profit faster. Before betting or calculating something, always check on bookmakers the odds yourself a double check that they match the ones on Oddspedia.

If they do (there will definitely be some matches that don't), open an arbitrage calculator [such as this one](#) and enter there the odds, and the amount you want to invest. Then you will see how much you should bet for every outcome.

The screenshot shows a green-themed interface for an arbitrage calculator. It has two main columns: 'Enter Odds & Stake' and 'Stake'. Under 'Enter Odds & Stake', there are three rows for bets and one for the total stake. Red arrows point from the odds input fields to the corresponding stake output fields.

| | Enter Odds & Stake | Stake |
|-------|--------------------|---------|
| Bet 1 | 6.4 | \$16.20 |
| Bet 2 | 4.7 | \$22.07 |
| Bet 3 | 1.68 | \$61.73 |
| Stake | 100 | |

After that you can place your bets with the different bookmakers from Oddspedia, wait, and then enjoy your profit!

Lastly, I would like to say that you shouldn't go too crazy and from time to time place some small random bets on other matches so the bookmakers don't get suspicious and ban you.

This has worked for a long time and its potential is insane. I calculated that from just a \$100 investment you can profit \$1500 (calculation below) in one year considering the fact you win from 2 matches per week with a profit of 3% per match. Imagine what you could do with more money...

$$100 * (1.06)^{48} = 1639 \text{ (End Balance)}$$
$$1639 - 100 = 1539 \text{ (Profit)}$$

Lock Profits

About

In this document, I will explain a very simple method which is a good way to get some investment if you don't want to invest money with the main methods right away.

It takes less than 20 minutes and you can easily profit \$100+ in Bitcoin which can be converted to cash.

This method will be divided into two parts. In the first part, I will explain how to use this method to get more than \$100. In the second part, I will shortly explain how can this method be used to earn a sustainable income.

The Method

Some of you might already know this website, it's called [Celsius Network](#). It allows people to earn a yield on their cryptocurrencies. They are a trusted company regulated in the United States, not some fishy company based in the Cayman Islands.

I don't use it to earn long-term yield, instead, I use their Promo Code promotion. They reward people for depositing money to their platform and having there the funds for 30 days.

Here are the promotions they at the moment offer:

| Promo Code | Reward Amount | Reward Coin | Minimum Transfer | Eligible Coin(s) | Lock Period |
|------------|---------------|-------------|------------------|------------------|-------------|
| HODL10* | \$10 | BTC | \$100 | All | 30 days |
| HODL50* | \$50 | BTC | \$400 | All | 30 days |
| HODL500* | \$500 | BTC | \$25,000 | All | 90 days |
| HODL2K* | \$2,000 | BTC | \$250,000 | All | 90 days |
| ETH20 | \$20 | ETH | \$500 | ETH | 90 days |
| ETH200 | \$200 | ETH | \$5,000 | ETH | 90 days |
| ETH600 | \$600 | ETH | \$20,000 | ETH | 90 days |

The promotions are frequently updated, so I recommend you to [check the current promotions yourself](#).

You can earn \$110 for just registering and depositing \$400. Let me show you how...

They offer such rewards because they want to attract long-term users with a lot of money because they are the ones who are the most profitable for the company.

The Method (Part 1)

You can get paid \$50 if you use anyone's referral code, \$50 if you use the HODL50 promo code and \$10 more from the HODL10 promo code. And also, some extra yield and the money you deposited.

The funds aren't "locked" in a way that you wouldn't be able to withdraw them, so don't worry.

This is exactly what I would do if I wanted to start with the main methods but didn't want to risk losing my investment.

So, to get started, find someone's referral link or code on Google, ask your friend (if they use Celsius already), or [use my link](#) and register with your real details.

Then deposit the required amount (in this case, \$400) in a stable coin like USDT or USDC. You can do it either by clicking on "Buy Crypto" in the Celsius app, or buy it on Coinbase and send it to Celsius.

Now click on Bitcoin, and the reward should say "Pending". After receiving the Bitcoin from the referral code/link promotion, withdraw it and activate one of the active promotions. Then, after receiving the reward, do the same. Once you use all of the promo codes you intended to, also withdraw your initial deposit.

Now you have \$110 plus the \$400 you deposited. You can use the extra cash as an investment for the main methods.

Method (Part 2)

If you want to take it a step further and earn more money from the Celsius program, you can do these things:

1. Tell your friends and family to join, make sure to tell them your own referral code.
2. Record a review about it on YouTube or pay someone to make you a video and include your referral link in the description. You can use the knowledge from the main methods to do so. My younger brother created a completely new YouTube channel, optimized it, and from just two videos he got \$200 from 4 registrations. He didn't spend a single cent on the channel and his videos still have less than 2000 views each. Good, isn't it?
3. Reply to people on Quora and Reddit that ask about Celsius, give them a good answer, and at the end of your answer add your referral link and tell them that they can get \$50.
4. (Just an idea, don't try) If you already profited the \$110, I mentioned in part one, you can actually get your Celsius account deleted. And then do the same one more time... This isn't professional advice and is for educational purposes only.

I wish you the best of luck with this method. As always, let me know if you have any questions regarding the method, I will do my best to help.

Introduction

Hello and thank you for purchasing Lock Profits!

You've made the right choice by purchasing this guide and it shows that you are serious about making money online. In this guide you can find multiple money-making methods, all of them were used by me and are proven to work. These methods are something that actually works, not old and saturated methods.

Unlike other sellers, I actually want you to make money. This is why all of my customers will get personal support and mentorship if needed. If you attempt the methods and fail to make money, you can check whether you can get a refund and request it afterward.

For most of the methods, you don't need to invest a large amount of money, however, smaller investments often help. If you would like to start with an as low amount of money as possible, you can check out the methods, and choose the ones that are easy to do for you.

About The Main Methods

In this document, I include profitable affiliate marketing methods. I've been making money with affiliate marketing for the past 3 years and throughout the process found many profitable niches and methods. I include here more beginner-friendly and easy-to-setup methods. And don't worry, these methods are something different than the methods from 2016 that you can find on Google.

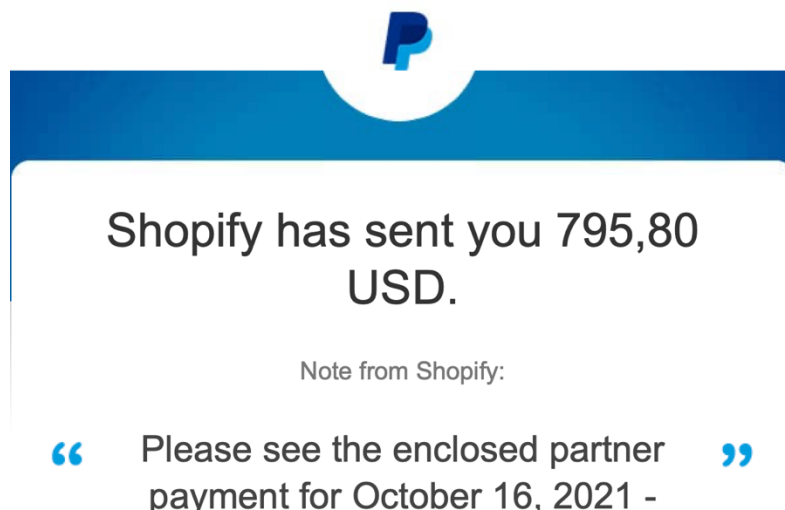

If you don't know what affiliate marketing is, I recommend you to read the [Wikipedia definition](#). There are many affiliate marketing methods and techniques in many different niches, therefore saturation of affiliate marketing is unrealistic. Many people say that affiliate marketing is saturated, but there will always be a new product or a new way to promote something.

Affiliate marketing is also in my opinion the easiest "business" to get started in. You don't need to invest huge sums of money, nor start your own e-commerce business like with dropshipping.

To motivate you from the start (not to brag), here are some of my recent earnings from multiple affiliate programs:

| VISITORS | REG. | DEPOSIT | HOLD | COMMISSION |
|--|---|------------|-----------|------------|
|  1278 |  115 | \$18216.49 | \$1785.62 | \$7930.38 |

On the screenshot above are earnings from the first method in this guide, I discovered it pretty recently, and it turned out to be one of the best methods I know.

On the screenshot above are only some of my earnings from the third method in this guide from the last 30 days. I am saying “only some” because you also get paid from other people/companies than Shopify. The \$795 only makes roughly 60% of the amount I made this month with this method.

WEEKLY SALES SNAPSHOT

| Week Ending | Gross Sales |
|---------------------------|-------------|
| 2021-12-07 (current week) | \$753.03 |

And finally, earnings from one of my Clickbank accounts from this week. As you can see, all of these methods are very lucrative.

Lastly, I think it’s important to note that you won’t be seeing these figures in your first weeks. It is possible to scale to this point, but it requires hard work and dedication. But unlike with many other methods, these methods actually work and make sense – you will see for yourself.

Crypto Semi-Autopilot Method

I recently found a new extremely profitable method with which you can get paid in cryptocurrency without any KYC verification. Firstly, I didn't plan to include it in this guide, but the fact that I successfully received 4+ payouts changed my mind.

Some people are doing it, but it's still profitable and it isn't well-known by the public. If you search for it on Cracked/Nullified or other forums, you will find zero results.

We will be profiting from a website called PocketOption. It's a trusted binary trading platform, but we won't be doing any trades and risk our money.

They have a pretty new affiliate program that is very lucrative. You get a 50% bonus from deposits of users you refer!

Here are my earnings from the first week of doing the method in Bitcoin (then I switched to another payout method):

\$253.14

total balance

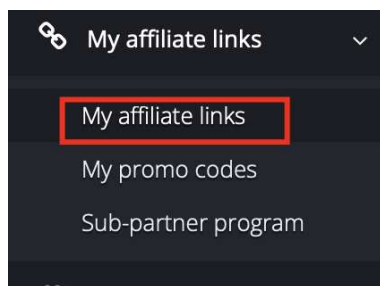

↗ 1 % (+\$2.35)

Crypto Semi-Autopilot Method

The first step is to register on the [PocketOption affiliate website](#). They automatically approve everyone from all countries which is great.

The next step is to add a payout wallet, you can do it by clicking on “Payments” and “Wallets”. You will automatically receive cryptocurrency payouts to your crypto wallet every week.

After adding a payout method, go to “My Affiliate Links” and create a new campaign.

The image below is what I use, but you can also just use the smart link.

A screenshot of a web form titled 'Create a new affiliate link'. The form has a dark header bar with the title. Below the header, there are four input fields: 'Campaign name' with the value 'ANYTHING', 'Promo code' with a dropdown menu showing '50START (bonus 50%; min deposit \$50)', 'Offer type' with a dropdown menu showing 'Deposit sharing', and a light blue informational box that says 'i Deposit sharing offer — You receive a commission based on the first deposits made by your referrals'.

And this is the link type I use:

| | | | |
|---------------|----------------|-----------------|---------------------------------------|
| Register link | ytdescription1 | Deposit sharing | 50START (bonus 50%; min deposit \$50) |
|---------------|----------------|-----------------|---------------------------------------|

On the next page, I will explain my two traffic sources.

Crypto Semi-Autopilot Method

First of all, I would like to show you how I get free **traffic from Instagram reels**.

Our goal is to reach an as broad audience as possible by making Instagram think that we're from the USA; this is why I recommend you to follow these steps:

1. The first step is to reset your phone (I use my second phone, you can back up your main phone if you want to and use it) and set it up with US region and US Apple ID/Google play account depending on the OS. Also eject your SIM card (you can skip this step if you are from the US, just make sure to reinstall Instagram and enable a proxy before running Instagram). You can use TextNow (free) for SMS verification.
2. Buy a US proxy for Instagram, I personally use [StormProxies](#). There are many other providers, but always make sure that their proxies are HQ and work with Instagram.
3. You can either buy a PVA Instagram account or register a new Instagram account yourself. Just make sure that your proxy is always on, you can enable it in the settings.

On the next page, I will show you some examples of Instagram reels and how to upload them.

Crypto Semi-Autopilot Method

The next step is to actually register and post content. As a profile picture, I usually upload a photo of a guy with a fancy car, you can find these under many hashtags on Instagram, and I choose a crypto-related or forex-related username.

The next step I did is creating a new Telegram channel. You can call it “[Your Name]’s Binary Options Signals”. Your name doesn’t have to be your actual name, it can be any name because people will think of it as more personal.

You will offer people an invitation to your other Telegram channel with your trading tips for free if they sign up with your affiliate link and deposit \$50 or \$100 depending on the type of your campaign.

Content in your Telegram channel should be in this order:

1. (Pinned and first message)
Welcome to [Channel Name]!
In this channel, you can check out reviews from clients using my trading signals.
If you would like to join for FREE, please send me “Join” using a private message: @YourUsername. I will send you further instructions.
2. After the pinned message you can add there reviews. You can use PocketOptions demo account to trade, and if you profit, screenshot it and message yourself from a second Telegram account and say how good your signals are. I have fifteen of these review screenshots on my channel.

Crypto Semi-Autopilot Method

After people contact you on Telegram, send them a pre-made message that says this:

- Hello and thanks for your interest
- You are one step away from financial freedom
- Stop looking for ways how to trade and start finally profiting
- To get access, do this
 - 1. Register using this link a new account (must be this link): [Affiliate Link, you can use bit.ly for tracking number of clicks]
 - 2. Verify your account and deposit at least \$50 to trade with
 - 3. Send me your account ID which can be found by clicking your profile picture
- Say that the affiliate link will give them a 50% deposit bonus and you will get a small commission at no extra cost for them
- Please let me know as soon you complete the steps

By now your Telegram channel and message template are ready, don't forget to add there some nice emojis, images (expensive items), and have correct grammar (use Grammarly to check).

So, let's jump back to Instagram. Make sure to have a title and a bio related to options trading. On the bottom line type something like Join My Telegram For FREE Trading Signals and add there a link to your Telegram channel. You can also use LinkTree, this is actually what I use.

Here is a random profile I found, it can be similar, but it should be more about options trading:

Crypto Semi-Autopilot Method

Once your Instagram profile and Telegram channels are finished, you can start posting reels on Instagram.

There are two ways to get content for reels:

1. Recording unique content

Most of the time have 2 Instagram accounts per proxy, on one of them I upload only my unique reels, and on the second one I post reuploads. For content I usually inspire on TikTok, you can search there for “PocketOption” and find many videos. Then record your own videos from PocketOption (you can use a demo account and show there profits from the “Closed” tab).

2. Reuploading content

I usually go to TikTok, search for “PocketOption” or “crypto” and look for some videos. Then download the video using [this tool](#) without the TikTok watermark. If there is any additional watermark from the author, just hide it with your profile picture/logo. To the end, you can add text saying “Link in Bio”.

Tip 1: Before re-uploading a video, remove the audio, and add a trendy beat on Instagram.

Tip 2: Upload 8-10 reels throughout a day per account. The more accounts you have, the better (don’t forget about switching proxies)

You can also try posting on TikTok, but I find it much harder to get traffic, and many videos get removed there. Instagram reels are in my opinion a good traffic source, if you don’t want to have many accounts, you can also make a personal brand from it.

Crypto Semi-Autopilot Method

The second traffic source is YouTube. I will keep it short because this process is simpler than the process of posting on Instagram reels and more fun to do, in my opinion.

On YouTube you will be posting videos about Pocket Options and Binary trading, this can include strategies, reviews, etc.

The first thing you'll need to do is to create a new YouTube channel which is explained on pages 25-26. The name of the YouTube channel should be either your name or something trading/binary options related.

After creating a YouTube channel you'll need to add to it a good logo, channel description, channel keywords, etc.

Now I will explain to you how to find good video ideas and opportunities to rank easily even though your channel is quite new...

The first thing I did is that I downloaded the [Uberguggest Chrome extension](#) for free. After downloading it go to YouTube, and search for Binary options, Binary trading, and Pocket Options (not at the same time). Now scroll down until you see the Ubersuggest widget on the right side of your screen and click on the small arrow pointing to the right.

| | | | |
|--------------------------------------|-----|--------|----|
| pocket options promo code | 480 | \$3.94 | 11 |
| pocket options broker | 480 | \$4.45 | 25 |
| Ubersuggest 1 - 10 of 181 < > | | | |

It will open a new tab and offer you a free trial for 7 days which I really recommend.

Crypto Semi-Autopilot Method

In the new tab copy my settings (700+ volume, SEO difficulty 0-40) and click on “Suggestions”. You can also click on Keyword Filters and enter there “How to”. Also, don’t forget to check “Related”.

Make sure to search for other phrases than Pocket Options as well and note them. You can take a look at my YouTube video title template in the resources folder.

Making Videos

Since you will be mostly recording videos about strategies, you will need a screen recorder. If you are on Windows, you can use OBS, on Mac QuickTime player.

The video content will depend on the video idea you found; I recommend you to check out competitors’ videos and redo something similar. I usually prerecord my videos and add a voiceover in an editing program. You can either speak yourself (even if you have an accent, people usually don’t care) or pay someone on Fiverr for a voiceover and send them a script that can be paraphrased version of your competitors’ audio.

For thumbnails I usually use Canva, but on Fiverr, you can find many good-value gigs where freelancers design 3 thumbnails for just \$10.

To rank I recommend you to use the strategy I explain on pages 24-27. Don’t forget to include your affiliate link in the description (use bit.ly) or an invitation to your Telegram group which can turn out more profitable.

I wish you the best of luck with the Pocket Options affiliate program, it’s extremely lucrative and isn’t saturated yet.

Simple and Profitable Clickbank Method

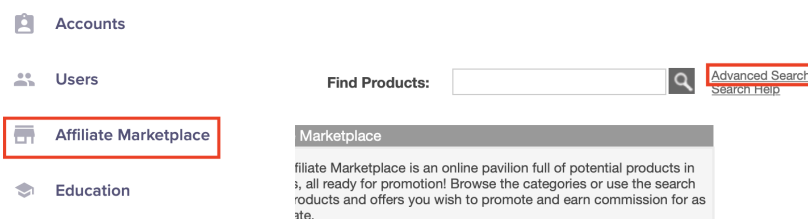

This part is about profiting from Clickbank with a proven-to-work method that has been working for years. With this method, I've been earning anywhere from \$50 to \$300+ a day. This method is partially known, but I decided to include it for 2 reasons:

1. It will never get saturated and I include many personal tips so you can get a huge advantage.
2. It will help you to understand the other methods and the concept of affiliate marketing. It's worth trying even if you fail because you will learn many new small skills along the way that will be useful in other methods.

I'll show you how to choose a product to promote (in a so-called "niche"), how to create a simple website, and how to promote it using different traffic sources plus show you some examples. I will show you multiple traffic sources, so there are absolutely no excuses for what you can or cannot use.

First of all, you will need a Clickbank account. To register, visit [Clickbank.com](https://www.clickbank.com) and register for free.

After registering click on "Affiliate Marketplace" and on "Advanced Search"

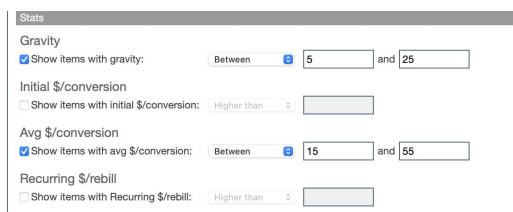

Now you are ready to start researching your niche (the product you'll promote). On the next page, I'll show what settings to use and how exactly you can find ideal products to promote.

Simple and Profitable Clickbank Method

Now select gravity between 5 and 25, gravity means how popular the product is. When you are starting, it's better to choose less popular products with less competition, these products are usually in sub-niches. The competition promoting products with higher gravity can usually afford to invest more money and have more tools.

The average amount of money per conversion should be between 15 and 55 dollars since it's a reasonable price. You can promote more expensive products too, but it can be harder to get sales at the start.

A screenshot of the Clickbank Stats filters interface. It shows several filter categories: Gravity, Initial \$/conversion, Avg \$/conversion, and Recurring \$/rebill. Each category has a checkbox to 'Show items with' and a dropdown menu to select a filter type (e.g., 'Between', 'Higher than'). The Gravity filter is set to 'Between' with values 5 and 25. The Avg \$/conversion filter is set to 'Between' with values 15 and 55. The other filters are set to 'Higher than' with empty input fields.

| Filter Category | Show items with | Filter Type | Value 1 | Value 2 |
|-----------------------|-------------------------------------|-------------|---------|---------|
| Gravity | <input checked="" type="checkbox"/> | Between | 5 | 25 |
| Initial \$/conversion | <input type="checkbox"/> | Higher than | | |
| Avg \$/conversion | <input checked="" type="checkbox"/> | Between | 15 | 55 |
| Recurring \$/rebill | <input type="checkbox"/> | Higher than | | |

Before choosing a niche, you should decide between two types of niches:

1. Non-recurring payment product: From products without recurring monthly payments, you get a one-time commission, which usually is higher than from recurring payment products, and you have more products to choose from. This is what I recommend if you are starting and have some time.
2. Recurring payment products: From products with recurring monthly payments, you get a commission multiple times, until the subscription is canceled. From my experience, it's harder to get sales, but a huge advantage is that you can earn money on basically autopilot. But before earning on autopilot it takes a lot of effort and time.
I started promoting recurring payment products after I got some sales with non-recurring payment products.

Simple and Profitable Clickbank Method

If you don't know in which category (niche) you should get started, you can choose one of these and try to find sub-niches:

1. Self-improvement
2. Beauty and Fashion
3. Dating
4. Health and Fitness

While searching for products, always make sure that the landing page looks good and doesn't look like one from 2009. On some landing pages (sales pages) you will find videos, if there is a video, make sure it's of good quality.

Simple and Profitable Clickbank Method

If you like a product and it meets your criteria, I recommend you to contact the vendor to test their responsiveness. You can either ask them a question or ask them for a review copy of the product. Make sure it looks professional and be kind.

Once you find some products, I recommend you to create a sheet using Excel, Google Sheets, or Numbers on OS X. Include there the product name, link, Avg \$/conversion, gravity, the commission in %, vendor's responsiveness, rating of the landing page, and your impressions. If you purchased the package, then you can find my sheet template in the resources folder.

| Clickbank Product Research Sheet | | | | | | |
|----------------------------------|--------------|---------|-------------------|----------------|----------------------------|----------------|
| Product Name | Product Link | Gravity | Avg \$/Conversion | Commission (%) | Landing Page Rating (1-10) | Personal Notes |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

Once you have a list of 8-13+ products, I recommend you narrow down and choose the best ones according to the info you filled into the sheet. If the gravity is low and the landing page looks good, then in most cases you found a good product. Write down only the products that you already consider good.

After writing down the products, you should be able to decide which ones can you use. This can be decided by looking at the commission, your rating of the landing page, etc. To get started, choose one product that “wins” when compared to others. If you found more good products, then you can save them for the future.

Simple and Profitable Clickbank Method

The next step is to design a website. This may seem hard, but believe me, it's not. If you can use Word, then you can design a website too. On this website, you will have some articles, your affiliate links, and an email collector.

Most people use Blogger or WordPress to develop and manage their niche website, I recommend WordPress.

To set up a WordPress website you'll need:

1. Hosting & Domain

There are many options, I prefer [Namecheap](#) or [GoDaddy](#) in some cases. If you are starting, [Namecheap](#) is easier to use in my opinion and very cheap. There are free alternatives too (such as InfinityFree), but they are way slower and often include ads. I recommend you to use Namecheap shared hosting because even the cheapest package can host up to 3 websites.

Also, make sure to buy a .com domain to rank better, the domain name should obviously be a keyword related to your niche.

2. Theme

I prefer and use most of the time a paid theme called Splash, it's in the resources folder if you purchased a premium package. If you are looking for something free, you can check out [GeneratePress](#) or [Astra](#).

The list continues on the next page...

Simple and Profitable Clickbank Method

3. Plugins

I'll include here some of my favorite and the most important plugins for your (micro) niche website.

a. **WordPress SEO by Yoast**

This is a basic SEO plugin.

b. **Website Builder**

This can include Elementor, Gutenberg (also add Gutenberg Blocks). This might won't be required as builders are automatically installed with many themes.

c. **MailChimp**

You can create a popup to collect visitors' emails.

d. **Akismet**

For preventing spam in the comments section of your posts.

e. **Social Snap / Monarch**

Many plugins like this enable social sharing, this will help you to get more traffic.

f. **WP Rocket**

This boosts the speed of your website, helps with ranking on Google.

g. **SEO Friendly Images**

This plugin will help you to rank your images on for example Google Images.

h. **Google Analytics**

Helps you to track traffic to your site.

As you can see, I mentioned many tools and it is easy to get overwhelmed. But don't worry, many tutorials are explaining all of these tools. On the next page, I'll cover alternatives.

Simple and Profitable Clickbank Method

I recommend everyone to try to set up a micro-niche site at least once on their own, by doing that you'll learn new valuable skills.

But if that isn't something for you, I have good news for you...

1. You can pay someone to outsource the work for you, for example on Fiverr or Upwork.
2. Premium package customers can contact me on Discord or Telegram, and I'll upload my personal template to their WordPress site for free. You'll just need to edit the information to fit your niche and add your own information.

One more time, I'm fully aware of the fact of how hard can this part seem, so don't hesitate to ask me any questions in case of confusion.

Also, don't forget to enable there an email newsletter popup, you can copy the email content from the affiliate page of the product you promote. The image below shows where the affiliate page is located. As an incentive to subscribe to your list you can offer people a mini course/e-book which can just be an article copied from the affiliate page on ClickBank or your own guide on the topic.

On the next page, I will show you some actual examples of these niche sites and how to find them, also what the next steps will be.

Simple and Profitable Clickbank Method

Finding niche sites of other people in the niche is always useful because you can “inspire” from some parts of their website. This includes images, articles (you’ll need to post 5-15+ articles, it’s explained in the next chapter), and promotional methods.

So, let’s open the Clickbank marketplace...

1. Find an offer you want to promote.
2. Open the affiliate page

3. There should be some content including premade articles
4. Now open articles and copy the title of one of these premade articles

5. Search for it on Google, there should be at least some sites with the same or similar article title and content.

5 Powerful Ways to Attract Money and Abundance in Your Life

Oct 20, 2020 — Do you want to know **how to attract money** and wealth? You can absolutely **attract money** and abundance into **your life** when you have the right ...

Simple and Profitable Clickbank Method

Now you can have a website with a similar layout if you are in the same niche. But the main reason why it's useful to find your competitors' websites is that you can inspire by their unique articles and rewrite them. You will need some articles because you actually want to provide people some value before getting their email.

Having at least 10-15 articles is what I recommend because you don't want your niche site to be empty.

You can either rewrite them yourself (I recommend you to open one window in Grammarly and next to it the article in the split-screen mode) or pay someone to write them for you which can be cheap. You can look for writers on Fiverr, Upwork, and Freelancer.

A good idea is to make the blog as branded as possible. So, create social media accounts for it, a good logo in colors of the website, etc.

Tip: If you want to save money and plan to pay someone for the articles, then post a listing for rewriting instead of writing brand-new articles. But don't forget to check for plagiarism on Grammarly or other websites.

On the next page, I will mention things you should check before actually driving traffic to your niche website...

Simple and Profitable Clickbank Method

You are almost ready to drive traffic to your niche website, but before doing so I recommend you check a few things:

1. You have a good-looking menu that is sticky and includes a link to the homepage, blog page (the page with articles, it can be named “Latest Posts” in the menu), free e-book/course (link to the e-mail newsletter invite), and contact us.
2. Your logo looks good and matches the colors of the website (**Tip:** Logo can be designed on Canva.com)
3. You have a newsletter window pop-up. If you don’t have it already, you can try following a [YouTube tutorial](#). I personally use MailChimp, they offer a free plan for less than 2000 newsletter subscribers.
4. All of your affiliate links are working.
5. Include links to other articles in your articles.

Focus on the present moment, be grateful for what you have while working on your future self.

If you think that your niche website is ready, you can continue and actually start getting traffic to your website. To do that, you can follow traffic methods on the next few pages.

Simple and Profitable Clickbank Method

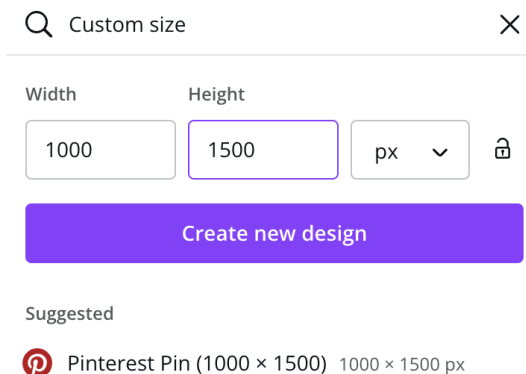

1. Getting traffic from Pinterest

If you wanted to get started for free, with this method it's 100% possible, however, you will need some time and dedication.

Pinterest is one of the best ways to get traffic to the website you just made and is underestimated by many people.

Since Pinterest is a social media where pictures play a huge role, you will need to have your own infographics. I personally use Canva to design my infographics, but you can also use Photoshop or something else.

To design infographics, create a new file with 1000 x 1500 pixels.

Q Custom size X

Width Height

1000 1500 px

Create new design

Suggested

 Pinterest Pin (1000 × 1500) 1000 × 1500 px

If you have some money to invest and don't want to design your own infographics, you can search for some on Fiverr, there are many sellers. I don't recommend paying more than \$15 for 75 pictures. And I design all of my infographics in the same colors as my website and with the same fonts.

Around 100-200 pictures should be enough to get started. The text in your infographics should be short and you can note there to click the link (your article)

Simple and Profitable Clickbank Method

After preparing your infographics, you can register a new Pinterest account and start a new board. You can take a look at your competitors' Pinterest accounts for inspiration.

Once you register, you can start publishing your posts. Make sure to add proper categories and tags depending on what your niche is and also a link to your website article.

I don't recommend you to post everything at once, post around 30 pins a day. If you don't want to do it all by yourself, consider using Jarvee for automation.

2. Getting traffic from YouTube videos

This is one of my favorite methods to get traffic because it requires low investment, is easy to understand, and it's extremely worth it in the long run.

Making YouTube videos can take some time, but once you understand it, it will be very easy. Two years back it took me an hour to make one video and upload it, now it takes me just about thirty minutes. And I'm still making money from videos I uploaded two years ago.

And don't worry, you won't need to show your face or even speak if you don't want to.

Simple and Profitable Clickbank Method

To get started, create a new YouTube channel (open YouTube settings, click on “Add or manage channels”, and “Create a new channel”), add a logo to your channel, channel keywords, description, link to your website, and banner. All graphics can be designed using Canva.

Once you do these steps, install the [VidIQ extension](#). The basic version is free, but I recommend you to pay for the Pro plan. This will allow you to spy on your competitors’ keywords and tags, and also suggest keywords for your videos.

To make your own videos I recommend you to use either use Camtasia (can be downloaded for free) or my favorite tool [InVideo](#) which allows you to easily access stock footage for free, includes music, and is also a pretty good text-to-speech tool.

If you prefer to pay someone for outsourcing the work, Fiverr is the right place. You can find there many sellers that will make the whole video for you for less than \$15.

If you aren’t sure what your videos should be about, just look for your competitors’ channels and make a similar video. The script can be also similar, but never 100% copy the title, description, and tags.

In the resources folder is my template for video descriptions and video titles, you can use it for all of your videos. You can also use bit.ly links to track the number of clicks.

I recommend you to upload 1-2 videos a day, and also have at least 2 YouTube channels per niche website.

Simple and Profitable Clickbank Method

If you have some money to invest and want to rank your videos way faster, you can try to follow these tips:

1. **Buy high-retention views**

High retention views help your videos to get ranked faster, I recommend you to buy non-drop high retention views from [this website](#). I usually buy around 4000-6000 per video.

2. **Buy likes, comments, and shares**

From the same website I recommend you to buy US likes (15% of the view amount you bought), custom comments with keywords (0.5%-1% of the view amount), and shares (5%-10%).

3. **Boost your click-through rate**

I always do this step and it is the most useful one out of these three tips. Register on a website like Microworkers or Rapidworkers and pay 100-200 people to manually search for your video using the longtail keyword in your title (how to...), watch the whole video, like, and subscribe. On Rapidworkers I spend around \$12 for 200 people to do all of the things I mentioned above.

I hope you found the Clickbank method interesting and will take an action and try it. In the next update, I plan to add to this method some ways to automate the traffic process and even a video tutorial.

If you would like to try a different approach to Clickbank, you check out the bonus method. For that method, you don't actually need to build your own website.

Lock Profits

The Method

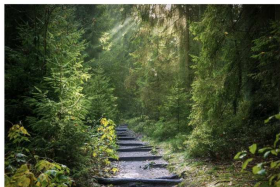

In this document, I will briefly introduce you to a simple Clickbank affiliate method that requires a \$0 investment or a very small investment if you want to.

In this method you won't be spending a long time researching the right product, instead, you will target people that don't want to pay for Clickbank products and search for keywords like "manifestation miracle pdf" or "manifestation miracle free download" on Google.

You will prepare a short article in pdf format that explains what the product they searched for is and some basic information. Here is an example:

Manifestation Miracle PDF Book By Heather Mathews (Manual)

Manifestation Miracle PDF Book By Heather Mathews (Manual)... The step-by-step blueprint that takes you by the hand and shows you exactly what you need to do to unlock the powers of Destiny Tuning, and make manifesting work for you more powerfully than you ever imagined it could!

[Click here to download the Manifestation Miracle PDF Book By Heather Mathews](#)

Manifestation Miracle PDF book is a formula designed to elicit immediate real life results... In the life of anyone who uses it. Over the last year, the Manifestation Miracle manual by Heather Mathews has been developed into the unique, never-seen-before Law of Attraction program it is today.

Stuffed full of simple, practical instructions and 'cheat-sheet techniques', the Manifestation Miracle PDF book is guaranteed to raise the pitch of your energetic vibrations for you. No matter what your life looks like right now.

Don't waste another ounce of precious energy 'struggling' and 'trying so hard' to make manifesting work for you...

In the Manifestation Miracle PDF manual and program, I will teach you everything I know about using Destiny Tuning to raise your abundance levels automatically, and force the Universe to give you everything you've ever wished for... without the hard work!

Leave all the time-wasting tricks and hocus pocus behind, and instead spark an explosion of abundance in your life... by using a formula based on solid science.

I have put so much energy, dedication, and time-tested proof into this formula... That it is absolutely guaranteed to bring your dreams to life!

Here's what the Manifestation Miracle PDF book by Heather Mathews will do for you:

- Make manifesting work for you more easily and accurately than you ever could have imagined... So that you can attract everything you've always wanted into your life!
- Teach you how to break free from the chains of negative thought patterns forever... In just 3 weeks (No more self-doubts & limiting beliefs holding you back!)
- Show you how to use the powerful psychological technique of 'Destiny Tuning' to raise your abundance levels automatically (So you never have to struggle to manifest again)
- Discover how to stop living someone else's life and start living the life you were destined to live (hint: you haven't even come close to achieving your true potential!)

As you can see, there is a blue text with a hyperlink, this hyperlink is an affiliate link that redirects users to the actual sales page of the product they are trying to get for free.

A surprisingly high number of people will buy the product you are promoting. You can do this with many products on Clickbank and don't even need your own website.

The Method

To get started, you will need to find products to promote. Gravity isn't important (unless you want to explicitly target popular products), instead, you should check the competitiveness of keywords like [Product name] + PDF or [Product name] + free download. You can use a tool like Ubersuggest, SEMrush, or another tool you prefer.

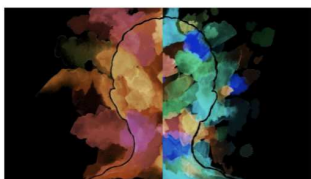

Once you find the products you'll promote (I usually find like 10 products in one niche), write a 4-10-page article/e-book with large font and stock images in Word or Google Documents and convert it to PDF. On every 1-2 pages should be an action-calling text with a bit.ly link that will redirect people to your affiliate link for the product you chose. In the article should be as many keywords as possible.

Here is an example of how it can look:

If someone would of told me a few years ago I would be a millionaire today, giving talks all around the world, I would of laughed at them.
But it was because I didn't believe them. I couldn't of believed them even if I wanted to, because my subconscious wouldn't let me... but that all changed once I started listening to that CD John gave me. It literally changed my life.

There is a reason why this information is being kept from you by the government, big pharma and the mainstream media.

This information is sacred and more powerful than anything you have ever encountered before.

How would you like to completely change the circumstances you are in right now?

Maybe your unsatisfied with your financial situation... Or you are unhappy with your relationships...

Or perhaps you suffer from health ailments... Or maybe you just lack direction, and clarity about your path in life... Regardless of what's keeping you down...

Can you spare 60 seconds to start the Ultra Manifestation PDF and Audio Method to re-organize your Internal Roadmap, so it aligns itself with the natural laws of the universe?

The reason why the Ultra Manifestation PDF and Audio Method works because it solves the problem at the root cause.

The isochoric tones, theta, alpha, beta and delta waves will enter your mind and dissolve the limiting beliefs that were previously holding you back. And in its place, it will create a brand new empowering Internal Roadmap.

The best thing is, there is nothing new to "learn".

[Click here to download Ultra Manifestation PDF and Audio Method](#)

This process literally is as easy as putting on headphones and listening to this before you go to bed at night, or any other time throughout the day.

Excited with my new-found knowledge, I went back to the local park and shared my discovery with other homeless people that were nice to me during my time out in the cold...

Most of them have been homeless for decades, and many were in their 50s and 60s. Almost ALL of them had some sort of health problem. So I created a Homeless Life Changing group, where I played my brand new Ultra Manifestation audio to the people who were interested before they slept...

The Method

Once your mini e-book is finished write and prepare a short 80–120-word abstract (description) full of keywords and upload it to these sites:

- joomag.com
- pubhtml5.com
- scribd.com
- academia.edu
- coursehero.com

Many of the websites will ask you for descriptions, titles, and tags, so make sure to include them.

From my experience, it's fairly easy to rank on low competition keywords without spending money on SEO.

If you do this with 8-10 products a day for a week on all of these sites, you should start getting some sales soon, in a matter of weeks.

Tip: If you want to scale your earnings, try posting videos with titles like “[Product Name] Scam – Watch Before Buying” or “[Product name] Honest Review – Is It a Scam?”. You can use screen-record their landing page and say some information about the product. Also, don't forget to mention that people can use the link in the description to get a discount. Lastly, consider using the tips on pages 26-27 of the main methods document to rank your videos easily. These videos will often after some time also show up on Google.
